A suspect SAM site, identified on KEYHOLE photography of [], is located in open terrain 52 nm NNE of Volgograd and one nm west of Gornyy Balykley. Construction was underway on this installation in [] 1/ KEYHOLE photography of [] revealed no construction nor any significant activity at that time. The site consists of the suspect launch area, within a probably fenced enclosure, and an unfenced support area. Both areas are served by an all-weather road. The suspect launch area is H-shaped and measures 500 by 320 feet. It contains four revetted suspect launch positions, each approximately 50 by 30 feet, located at the termini of the two roads forming the legs of the H. A drive-through revetment 250 by 115 feet is situated on the site service road. Three par-

allel dead-end roads, served by the site service road within the enclosure, are located 900 feet east of the suspect launch area. Each of these roads is 115 feet long and 18 feet wide at the base, flaring to a width of 35 feet at the end. The support area, located 2,300 feet NE of the center of the suspect launch area, contains nine buildings ranging in size from 35 by 20 feet to 160 by 55 feet. Two additional buildings are located adjacent to the road connecting the support area and the suspect launch area. One, 50 by 45 feet, is located within the enclosure of the suspect launch area, and the other, 50 by 30 feet, is just outside it.
